

# Disable pop-up blocking for VPW video calls

Last Modified on 11/12/2020 6:26 pm EST

To make and receive video calls with VPW, you must disable blocking for your vappcenter.com domain. If you are currently blocking pop-ups in your browser:

1. In Chrome Settings, choose Advanced Settings.
2. Scroll to Privacy and click Content settings.
3. Scroll to Pop-ups and click Manage exceptions.

4. Add your vappcenter.com domain (e.g., acme-co.vappcenter.com) or simply \*.vappcenter.com and set to Allow.
