

Receiving Calls on the Edge IP 9800 Series Phone

Last Modified on 09/27/2017 11:41 am EDT

When you receive a call, your phone rings and the LCD displays the incoming call information. To answer the call:

- Pickup the handset.
- Press the Speakerphone button:

- Press the Headset button:

If a headset is not plugged into the Headset port, you won't be able to hear the call because the audio is going to the headset port, but the call is still active. To recover the call, press the Speakerphone button, or pick up the handset and press the Headset button again.
