

Record a Call

Last Modified on 11/12/2020 7:00 pm EST

To record a call in progress, click the Record tab at the bottom of the call window.

On the Record a Call tab, click Start Record. After you start recording, you can choose to Pause (and then Resume) call recording, or to Stop your recording to save it. You will see a confirmation when your recording is saved.

You can access your call recording through your [Call Recordings](#) in the [History](#) tab.

The screenshot displays a software interface for managing call recordings. At the top left, there is a user profile icon with the initials 'KS' and a notification badge. The main header area includes a 'Recording' status indicator and a close button. Below this, the interface is split into two main sections. The left section, titled 'Call Recordings', features a search bar and a list of recordings. The right section provides a detailed view of the selected recording, including a timestamp, a progress bar, and a notes field.
