

Edge IP 9802

Last Modified on 06/08/2017 5:13 pm EDT

Description: Very economical phone for locations that just need basic voice features. This simple phone uses paper-printed labels to identify the functions of the 4 programmable buttons. The phone is designed for simple deployment with support for LLDP-MED and DHCP to identify correct network settings and the Wave IP address. If no matching MAC address is already configured, then the phone will ask to be assigned to a specific extension.

Connection Type: IP Phone

Buttons: 4 programmable DESI label buttons

Features Supported: All Wave IP button feature set.

Expansion Console: None

Headset Jack: RJ-9 headset port

Screen: 2 lines gray scale LCD

Speakerphone: Half-duplex

Power: POE or external power supply (sold separately)

Auto-Answer: Yes

VPN: Yes

Network Connection: 10/100

Key Configuration Items: Phone can use LLDP-MED to get VLAN Information (requires switch that supports broadcasting LLDP-MED). Phone can use DHCP to receive Wave configuration information. Uses Wave on-board TFTP for initial setup. HTTP is used for subsequent configuration.
