

Set Up Click to Dial

Last Modified on 11/12/2020 6:38 pm EST

With Click to Dial and Chrome as your browser, you can simply click on a phone number on a web page to place a call using VPW. ([Details](#))

ViewPoint Web - Click to Dial is a Chrome extension that you download from the Google Play Store.

Important! After downloading, the extension won't work until you have registered as a VPW user with a VCC server.

To set up Click to Dial:

1. In Chrome, go to:

<https://chrome.google.com/webstore/detail/viewpoint-web-click-to-di/mbflageiddjcboajjahfefemgbbkbpj>

2. Click **ADD TO CHROME**.
3. Click **Add extension**.

4. When the extension has been added, exit the Google webstore.
5. In Chrome, browse to: `chrome://extensions/`.
6. Find ViewPoint Web - Click to Dial in the list and click **Options**.
