

# Record a Call

Last Modified on 11/12/2020 7:02 pm EST

To record a call in progress, click the Record tab at the bottom of the call window.

On the Record a Call tab, click Start Record. After you start recording, you can choose to Pause (and then Resume) call recording, or to Stop your recording to save it. You will see a confirmation when your recording is saved.

You can access your call recording through your [Call Recordings](#) in the [History](#) tab.

The screenshot displays a software interface for managing call recordings. On the left, a sidebar titled "Call Recordings" contains a search bar, an "Inbox" dropdown, and a list of recordings. The top recording is selected, showing a play button, a refresh icon, and a trash icon. The main panel on the right shows the details of the selected recording, including the caller's name "Kathryn Sikes" with phone number "7815075225", the time "12:52 PM on Thu 2/25/2016", and a progress bar from "00:00" to "00:22". Below the progress bar is a "Notes" section with the text "Reviewing Project with Susan (this is her cell phone)". The interface includes a top navigation bar with a user profile "KS", a notification bell, and icons for contacts, messages, and recordings. A bottom navigation bar features a list icon and a right-pointing arrow.
