

# Call Recordings

Last Modified on 11/12/2020 6:53 pm EST

You can listen to your Call Recordings on your ViewPoint Web [History](#) tab. They are created when you make a [recording](#) of an active phone call.

Click on an entry in your call recordings list to listen to your recording, view details about call participants, and write up related [call notes](#).

You can choose to forward your recording on to another contact with the Forward tab in your call recording window.
