Getting Started with vAppCenter Domain

Last Modified on 11/12/2020 6:29 pm EST

Obtain a vAppCenter subdomain for your company from your dealer or from Vertical's order processing.

The following will be required to obtain a vAppCenter subdomain:

- Company Name (e.g., Acme Company)
- Requested vAppCenter Subdomain (e.g., acme-co). Will become acme-co.vappcenter.com. Must be approved. Suggested subdomain will be the company's registered domain (e.g., "acme-co" for "acme-co.com"). Minimum of 4 characters, but longer subdomains have a higher chance of being approved. Approvals may take time, as this is a manual process.
- Administrator first and last name
- Administrator's email address. A valid email address is required, and will receive a welcome email once the vAppCenter subdomain is created.
