

Account Setup

Last Modified on 11/12/2020 6:29 pm EST

When your account is created, you should receive a welcome email containing a button to finish your setup. If you do not receive your email within a few minutes, check your spam folder just to be certain it did not get marked as spam. Your administrator can resend the welcome email.

Clicking on the button or the link below will take you to the create password form. The password strength must be high enough to proceed. Tips on making the password stronger may be displayed. Passwords are hashed before sending to the server, and then again on the server. Passwords are never stored by VCC and can never be retrieved.

After clicking on "Create Password" you will be taken to your new dashboard.
