# Sign In

Last Modified on 11/12/2020 6:29 pm EST

To login to vAppCenter, navigate your browser to the subdomain that was assigned for your company (e.g., acme-co.vappcenter.com).

If you have not previously logged into the site and chose "Remember me" during sign in, you will be presented with the following form:

- Enter your email address
- Optionally select "Remember me". Doing so will cause this browser to remember your email address so that later when navigating to the site, the email address will be automatically filled in for you. This will also allow you to navigate back to the site without providing your credentials again until the login session times out (typically one week.)
- Select "Next"

You will then be presented the following form:

- Enter your password and click "Login"
- You can hit the back button if this is not the correct email address for the account
- If you cannot remember your password, choose "Forgot Password"
