

Profile Settings

Last Modified on 11/12/2020 6:30 pm EST

Use Profile to save settings for the user.

The screenshot shows a web browser window with the address bar displaying <https://acme-co.vappcenter.com/settings>. The page layout includes a dark sidebar on the left with the 'Profile' header and three menu items: 'General' (gear icon), 'Wave' (list icon), and 'Avatar' (person icon). The main content area is divided into three sections. The 'General' section contains a 'Personal message:' label and a text input field. The 'Wave' section contains the instruction 'Enter credentials for the Wave user to link to this account:', followed by a 'Wave username or extension:' label and a text input field, a 'Wave password:' label and a password input field, and a blue 'LINK' button. The 'Avatar' section displays a current avatar image, a 'Drag Photo Here' instruction with a file upload icon, and a blue 'BROWSE' button.

- Personal Message. Used for display in ViewPoint Web's directory and may be used in other applications.
- Wave. Used to link or unlink a Wave User account with the vAppCenter account.
- Avatar. Defaults to the [Gravatar](#) image for the user's email address. The user can customize the avatar either using [Gravatar](#), or uploading an image.
