

# Introducing Summit2400!

Last Modified on 02/17/2023 2:40 pm EST

We're excited to introduce the upcoming **Summit2400!**

The Vertical Summit2400 is an intelligent business communications gateway that delivers hybrid and UC-based telephony solutions to meet the evolving needs of small, medium, and large enterprises. Whether a small office needs basic voice or a multiple-site business needs to integrate mobile workers, Summit2400 delivers!

## What Do You Get with Summit2400?

### **Simple Unified Communications**

Unified Communications capability is built in to Summit2400. Use voice, video, instant messaging, conference calls and visual voicemail, all on one simple and easy to use platform. Summit2400 is designed to be intuitive and provide your team easy to use tools and features.

### **Reliable and Resilient**

Total reliability is the only option for your communications. Summit2400 delivers complete resilience through geographic redundancy and inherent modular architecture.

### **Anytime, Anywhere Connectivity**

Access the power of your Unified Communications platform regardless of your device or location using smartphone, tablet or PC applications.

### **Scale with your growth**

Summit2400 is designed to deliver the flexibility you need as your organization grows. Your communications can easily adapt to meet changing needs.
